IMPROVED CRUSHING MACHINE. C. H. GOODMAN'S

MACHINERY FOR CRUSHING, GRIND-ING. AND TRITURATING weth, Granite, Flint, Concrete, Potters' Rough Stuff, Cement, Chemicals, &c.,

Also for Washing and Separating Metals from Ores, and Amalgamating Gold from Quartz. This apparatus, from its many advantageous quali-ties, viz., Simplicity, Efficiency, and Cheapness, combined with Superabundant Strength, is rendered equal to the roughest work, likewise being comparatively light and easy of transit. The machine stands alone and

UNRIVA LED IN THE WORLD. If the material is no required to be reduced finer than rough sand, or fine gravel, it may be worked or pur-chased without the Triturator, the same only being used in the production of fine powder. Likewise, the washing or analgamating dish will only be needed when ores and

not applicable to one object only.—Its advantages may a summed up thus:—

1st.—The crusher consists of a horizontal ram, mount of loosely on an eccentric, by means of which a crush ag and gridding movement is attained.

2nd—The material is reduced to its required size by simply setting the axed face.

2nd—The two acting faces are moveable, and can be replaced in a few minutes at a trifling cost, which does not amount to one hundredth part the cost and trouble of rollers.

not amount one numerical part the cost and trouble of rollers.

4th—Where the triturator is required, the material passes over a vibrating sieve (as seen in the idustration), the fine falling through, and the coarse passing into the disc hopper, where it becomes reduced to powder.

5th—Where washing and amalgamating powers are required, the finely ground quartz is discharged into the disk containing quicksilver, wherein water is constantly poured, the whole being stirred by means of resters, and the mud and tailings pass off into a sluice attached to the, iip of the disk, intended to catch what precious metal may have escaped amalgamation.

It may also be necessary to state the Triturating disca are constructed in such a way as to admit of long wear, and will work to the last without the slightest injury to the quality or fineness of the material.

THE MACHINES ARE MADE IN THREE SIZES.

THE MACHINES ARE MADE IN THREE SIZES. No. 1. Crushing 20 tens per day of ten hours, Road metal No. 2. " 40 Producing 4 tons of Quartz per 10 hours,
No. 3. Crushing 60 tons per day of ten hours Producing
8 tous of Quartz per 10 hours.

Batract from "THE ENGINEER," May 12, 1871, page 329 "The ram-head works against a fixed toothed face, and, if there were nothing more, stones not into the hopper would be simply crushed between the two-much as in Blake's machine. But here the similarity ends. It has been found that what we may beet term a cliewing action materially facilitates the breakage of the stone, and this chewing action is obtained by mounting the ram-head and its thrust-bar or handle on an eccenthe ran-head and its thrust-bar or handle on an eccitric close to the head. The motion attained by the softhis centric produces the precise effect required ve efficiently. All the arrangements are very simple a nechanical, and the machine appears to have nothin about it to get out or order. We were ninch pleas with it."

substance calcula ed to retard its move-

ments, lest the body becomes weakened

The tree, the shrub, and the plant are

equally dependent for life and vitality

upon the unrestricted flow of the moist-

provided them. These constitute the

highways through which that commerce

is maintained that gives life, and growth, and power to every species of the animal and vegetable kingdoms. Now, a coun-

try is not unlike a living body in this

respect. Its growth, its development and its ultimate well-being are just as

surely dependent upon good substantial

one case or the unrestricted flow of sag

advocated the policy of substantial road

of prosperity to which her abundant re-

sources justify her in anticipating, until

a good trunk road is construct-

complish; but that is no reason why it

should not be undertaken, and continued

year after year until the last mile is con -

pleted. The question has been asked will it pay to make such a road? We

might answer that question by asking will it pay not to make it? Can the

country by any possibility ever be opened up, the lands settled upon and cultivated.

or otherwise utilized, until roads are

made to facilitate travel and truffic be

tween the various settlements and their

nearest markets? There can be no

reasonable doubt about a good wagon

road through this island paying for the

expenditure made upon it. That there

are many truce of land lying be-

never can be utilized without it, is a fact

that cannot be denied. And were that

thousand dollars, the land thereby

than cover the cost of its construction

by speculators. On the other hand,

road through the island it should be the

means of inducing one hundred and

country, that itself would be an equiva -

lent for the whole outley, according to

the per capita valuation placed

by the Bureau of Agriculture and Sta-

tistics of the United States. One thou-

sand dollars per annum is the estimated

settler in the United States, and as it is

the direct result of executing such a

work, we may very safely affi m that the mouey so invested would yield a hand-

some profit. But were one hundred and

fifty multiplied by ten or by twenty in would scarcely tell the actual increase to

our population that would be realized by

the construction of a substantial trunk

road through this island. The cost of

running the steamer I longlas on the route

between this city and East Coast set le-

ments was last year estimated at \$12,500

year, by way of providing the settlers

slong that route a means of reaching a

market for the sale of their products and

have the Government or the East Coast

Allow that the Government has sunk

one-half that amount, and that the East

Coast settlers have paid the other half in

ber first trip over the route. And the

Government may continue thus to ex-

pend money on steamboats till doomsday, and at the last crack the country will be

not a whit the better for the money spent than when the steamer's wheels made

their first revolution. We do not pre-

tend to deny that in the absence of roads

the Island; they could not have made out to live had she not been at their ser-

the least,—and to propose a continuance of such a system for an indefinite period

of time, to our mind is the very some of

travel one handred and fifty miles in order to reach a market? Roads create

markets, and justeed of farmers having

to travel great distances to find buyers

and sellers, the rule is that buyers and

sellers generally meet the farmers consid-

crably more than half way in order to do

settlers to-day to show for that money

that class of immigrants

siness with them. The policy adopted by the Canadian Government has always have been brought into use and under It is an indisputable fact in physiology cultivation that never could have been that in order to produce a healthy body utilized in any other way; and a policy hat has proved so successful in our sister there must be perfect freedom of circula-Provinces, we cannot but believe would tion of the blood-that the avenues be found of equal advantage if put in through which the life-sustaining principractice bere. ple flows shall not be obstructed by any

the Daily Standard Wednesday, April 24, 1872.

THE LAW OFFICERS OF THE CROWN -Mr. Otway assumed that every word of the the law officers of the Crown, but on Tuesday he apologised to the Attorney General for the ne apotogues to the Attorney General for the statement, and said that he had been authori-tatively informed that no portion of the Treaty was submitted to the law officers of the Crown except those rules which were hereafter to be regarded as rules of inter-national law. We (Law Journal) hold that treaty constituting a tribunal for the consideration of certain pecuniary claims should have been sumpitted to the law officers. That was the course pursued by the Government of Washington, and it ought to have been pursued by our Government. It would probably have saved us from a very unpleasaut difficulty. We were under the impression that it is the duty of the law officers to advise the Government on all important legal matment to consuit the law officers on all such matters. Mr. Otway says the custom prenec.ed with that department. The custom was a very wise one, and, as we think, so

strictly constitutional, that, in our opinion, the neglect of it is a breach of the etiquette of the Constitution. THE ROYAL THANKSGIVING TOILETS .- The Queen wore a corded back silk dress, trimined with miniver, and a jacket to match. He. Majesty also wore a black bonnet, with black ence, &c. and white leathers and white flowers. The The Princess of Wales, a dress of dark bine satin, with po onaise of blue velvet, trimme with fur, and a bonnet of blue vervet, with feathers of the same color. Princess Bratrice wore a dress and jacket of rich mauve silk. trimmed with swan's down and a white hat with ma ve and white feathers. The Prince of Wates wore the uniform of a general officer, with the collars of the Orders of the Garter and Bath. The Dake of Edinburgh wors the naval unitorm, with the collars of
